

- 1 Simulation of Flows in Complex Geometries:
New Meshing and Solution Methods**
Milovan Peric (CD adapco Group)
- 2 Lattice-Boltzmann Methods - Basics and Recent Progress**
Manfred Krafczyk, Jonas Tölke (Universität Braunschweig)
- 3 Strategic Directions in (CFD) Engineering Simulation**
Dipankar Choudhury, Paul Bemis (Fluent Inc.)
- 4 Turbulence Modelling for Technical Flows**
Florian R. Menter (ANSYS Germany GmbH)
- 5 MpCCI - Multidisciplinary Simulations through Code Coupling**
Carsten Dehning, Peter Post, Christian Rümpler, Klaus Wolf
(Fraunhofer Institute SCAI)
- 6 Der Einsatz von CFD zur Reduktion des Entwicklungsrisikos**
Martin Mann (arsenal research)
- 7 Extended Postprocessing - New Techniques in CFD-Visualization**
Martin Schulz (science + computing ag)
- 8 CFD Software Quality Assurance at AVL
Das Testen der CFD Softwareprodukte AVL FIRE und AVL SWIFT**
M. Suffa, P. Cartellieri (AVL List GmbH)
- 9 CpFD: Simulation of Microfluidic Systems**
Friedhelm Schönfeld, Klaus S. Drese (Institut für Mikrotechnik Mainz
GmbH - IMM); Steffen Hardt (University Darmstadt)
- (10 Design Fire Scenarios for CFD Smoke Spread Calculations in
Underground Subway Station and Evacuation Simulations in a
Performance Based Fire Safety Concept**
Rainer Könnecke, Volker Schneider
(I.S.T. Integrierte Sicherheits-Technik GmbH)) - *Vortrag fehlt*
- 11 Numerical Simulation of Coolant Mixing at the ROCOM Test Facility
with CFX-4 and CFX-5 based on Complex Meshes**
T. Höhne (Forschungszentrum Rossendorf)
- 12 Parallel Lattice Boltzmann Simulation of Complex Flows**
Dirk Kehrwald (Fraunhofer Institute ITWM)
- 13 Numerical Simulation of Coupled Fluid-Solid Problems:
State of the Art and Applications**
Michael Schäfer (University Darmstadt)
- 14 Analysis of Coupled Fluid-Structure Systems Using MSC.Nastran**
Michael Hermes, Johannes Wandinger (MSC.Software GmbH)
- 15 Coupled Fluid-Structure Simulations with ANSYS and CFX**
Volker Bäumer (CAD-FEM GmbH);
Martin Kuntz (ANSYS Germany GmbH)

- 16 Free Surface Jet Flow Interaction with a Pelton Bucket**
Felix A. Muggli, Torsten Wintergerste (Sulzer Markets & Technology Ltd.)
- 17 Simulation of the Airbag Deployment Process in „Out of Position“ Load-cases**
Ulrich Göhner, André Haufe (DYNAmore GmbH)
- 18 Basic Investigations on a Formula-1 Airbox Using Coupled 1D/3D Flow Simulation**
Thorsten Maertens (Toyota Motorsport GmbH)
- 19 Topology Optimization of Air-Guiding Systems**
Franz R. Klimetzek, Oliver Moos (DaimlerChrysler AG)
- 20 Numerical Simulation of the Airflow onto the Brake System of the VW Phaeton**
Friedhelm Decker, Matthias Körner (Volkswagen AG)
- 21 Numerical Analysis of Material Flow in Continuously Reinforced Extrusion of Profiles**
Marco Schikorra, Michael Schomäcker, Matthias Kleiner (University Dortmund)
- 22 Flow Simulations for the Plastic Injection Molding Process**
Mathias Moog (MAGMA Gießereitechnologie GmbH);
Joachim Linn, Oleg Iliev (Fraunhofer Institute ITWM)
- 23 Simulations of Viscoelastic Polymer Melts Ows**
Dariusz Niedziela, Arnulf Latz, Oleg Iliev (Fraunhofer Institute ITWM)
- 24 Simulation of a Plasma Enhanced μ -jet-CVD Process**
C. Dehning, A.-M. Leventi-Peetz (Fraunhofer Institute SCAI);
A. Holländer, K. Silmy (Fraunhofer Institute IAP)
- 25 CFD and Analytical Modelling of Micro Heat Exchangers**
Tobias Baier, Klaus Stefan Drese
(Institut für Mikrotechnik Mainz GmbH – IMM)
- 26 Coupling Flow Simulation with Structural-dynamic Thermal Simulation in the Case of Swarf Extraction near the Tool of a Machine Tool**
Petra Wieland (Fraunhofer Institute IWU);
Frank Weidermann (FH Mittweida)
- 27 CADFIX - Konvertierung mit Reparatur und Qualitäts-Checks nach Sasig**
M. Forster, W. Hochreiter (TranscenData Europe Ltd)

For your notes
